Commercial Pool & Spa Metering Pumps
Designed For Dependable Performance

Stenner's peristaltic pump is self-priming, provides automatic de-gassing and no loss of prime. The 3 point roller assembly assists with anti-siphoning. The pump offers reliable, repeatable injection and the output volume is not affected by back pressure. The durable pump tube is manufactured as a solid piece construction; plus tube lubrication is not required. The patent-pending QuickPro® pump head and the Econ patented quick release pump head provide quick tube replacement without tools, for easy maintenance. The pumps are tested by ETL to conform to ANSI/NSF STD 50.
